

# Zooming In and Out

Knowledge enables students to zoom in and out; to both expand on particular elements of a lesson and see the bigger picture.

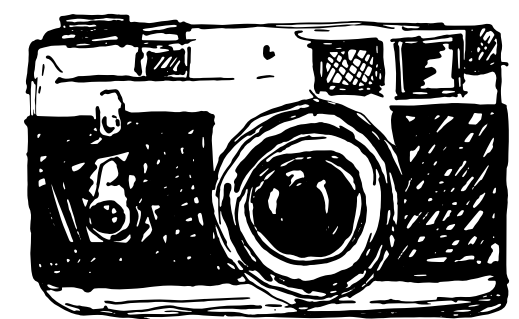

## Zooming In

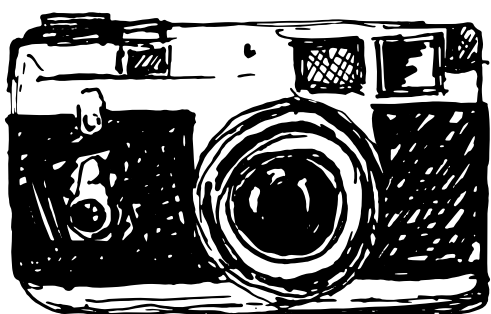

The ability to break down a particular bit of information or concept or event.

## Zooming Out

Enables the ability to see how singular information or events fit into the bigger picture.

## Fixed Lens

Without knowledge, students see through a fixed lens; no ability to break down a topic or see how it fits into the bigger picture.
